

REMARKS

Applicant has amended Claim 18 to further clarify the location of the separating wall. Following the examiner's amendment which deleted the limitation that the separating wall is soaked by the level adjustment water, it may not be clear that the separating wall divides the airtight tank between a first chamber and a second chamber having level adjustment water as shown in Figure 1. In order to clarify the location of the separating wall in the tank, applicant has deleted "and sealed at its lower part with a separating wall." No new matter has been added and no new search is required as all recited limitations have been previously searched. Entry of applicant's amendment under 37 CFR 1.312 is respectfully requested.

Respectfully Submitted,

By:
